

Carl Balansag

Carl.C.Balansag@gmail.com | Sacramento, CA

EDUCATION

Los Rios Community College

Associates of Science, Computer Science | GPA 3.8

August 2023 - June 2026

Sacramento, CA

California State University, Sacramento

Bachelor of Science, Computer Science

Expected June 2028

CERTIFICATIONS & SKILLS

Certifications: Google - Data Analytics | Meta - Front End Developer | Bay Valley Tech - Full Stack Developer
CompTIA A+ (In Progress)

Skills: Troubleshooting hardware and software issues | User support & training | Database management | Ticketing system management | Full Stack Development | Web Development | Object-oriented programming

Technology: Python | C++ | JavaScript | TypeScript | HTML & CSS | React.js | Next.js | Node.js | MySQL | Git | Microsoft 365 | Rest APIs | Tensorflow | Docker

WORK EXPERIENCE

Jack In The Box | *Sacramento, CA | Shift Leader*

October 2022 – Present

- Train 15+ team members, improving onboarding efficiency.
- Managed daily operations including food preparation, cash handling, customer resolution, and safety compliance.

American River College | *Information Technology Student Support*

January 2023 – February 2024

- Provided technical support for students, faculty, and staff across hardware, software, network connectivity, classroom technology, and printer issues
- Deployed and configured campus workstations, including imaging laptops/desktops, setting up new workstations, cabling peripherals, and supporting 200 networked printers

Bay Valley Tech | *Web Developer Intern*

February 2024 - August 2025

- Developed and maintained responsive web apps using JavaScript, React, Node.js, and Express.
- Integrated APIs and backend services; assisted with cloud deployments and optimized app performance.
- Collaborated with team members using GitHub to ensure version control and project planning meetings.

VDR Real Estate | *Real Estate Intern*

March 24 - July 2024

- Provided software training and technical support to real estate staff, improving team efficiency.
- Created internal documentation and training decks using Microsoft Word, Excel, and PowerPoint
- Provided tech support, troubleshooting, and training for staff, including account setup and configuration

California Air Resource Board | *Sacramento, CA | Student Assistant IT*

July 2025 - December 2025

- Process air quality and vehicle regulation citations, ensuring accurate documentation.
- Documented processes, tracked incidents, and updated system records for accuracy.
- Research and Assist in the preparation of internal reports by analyzing citation and complaint data

California Transportation | *Sacramento, CA | Student Assistant*

December 2025 - Present

- Analyzed and code traffic collision reports into standardized database format for district-wide safety analysis
- Maintained data accuracy through quality assurance reviews while processing high volumes of police collision reports
- Processed and validated large datasets from multiple sources, ensuring data integrity and consistency across databases

PROJECTS

Automated Reseller Inventory System

January 2026

- Deployed full-stack bot serving 500+ active resellers using Python 3.8, discord.py 2.3, and async SQLAlchemy 2.0 with PostgreSQL, enabling automated inventory and sales tracking
- Implemented AI-powered analytics using Google Gemini API for natural language queries, providing instant ROI calculations and sales insights from structured inventory data
- Integrated Google Sheets API v4 and Apps Script to automate spreadsheet operations while preserving formulas and validation, eliminating manual data entry across 500+ independent user instances.

Spotify Analytics & Playback Web App

<https://spotify.carltechs.com/> June 2025

- Full-stack music dashboard with React, Next.js, Tailwind, Node.js, and Spotify API for authentication, personalized data, and in-browser playback control.
- Integrated Firebase Realtime Database to track activity, history, and preferences for persistent user experiences.
- Optimized API calls and token refresh, reducing load times by 30% and ensuring smooth playback.
- Designed a responsive, interactive UI to boost engagement and session duration.

History Day Project *School Project*

<https://history-day.vercel.app/> March 2022

- Created user-friendly, visually appealing site using HTML, CSS, and JavaScript
- Received positive feedback from judges and peers for the website's design, functionality, and effective presentation, contributing to the class's recognition at the state
- Collaborated with classmates and faculty to collect and organize content, ensuring comprehensive and engaging representation.

Nasa Space Apps Hackathon

September 2025

- Developed a full-stack web application for exoplanet detection using React frontend and Python TensorFlow for backend, integrating NASA exoplanet database for real time astronomical data analysis, and data visualization
- Built and trained a machine learning model using TensorFlow to identify exoplanets from NASA datasets, implemented data cleaning and processing and neural network architecture for exoplanet pattern recognition
- Collaborated in a fast-paced hackathon environment to deliver a working web app, coordinating between peers to ensure seamless integration.
